Comm

Request for Authority to Conduct Unclassified Communications
Training at the [redacted]

25X1A

Reference: Memo fr Chief Commo to ADSS dated 18 Sept 1950, subject,
"Establishment of Basic Communications Training Course"

25X1A

1. On 31 October 1950, the Director approved the establishment of a Basic and Intermediate Communications Training School for provisionally cleared personnel as outlined in reference memorandum. Subject school required the assignment of 5,000 square feet of space suitably located and equipped for this purpose. It now appears that the [redacted] 25X1A [redacted] is available and would admirably serve to house this Communications School.

25X1A

2. It is believed that the [redacted] may be readily adapted to provide quarters, messing, classroom and laboratory facilities for the 100 students and 15 instructors as now authorized in reference memorandum, in addition to such supernumerary and administrative officers as may be required. It is understood that Services is prepared to furnish and operate all housekeeping and general administration required. Since neither sensitive subjects nor material will be taught or exposed in the proposed school, "X" clearance appears adequate for all personnel involved. Security fences, guards and maintenance facilities necessary for nominal protection against vandalism, fire and other hazards will, of course, be required.

25X1A

3. Accordingly, it is recommended that authority be granted to utilize the [redacted] for the Basic Communications Training Facility, and that the property be modified, equipped and staffed as outlined above. The Communications Training Facility could be terminated and the property made available for other purposes on extremely short notice. Funds for the Communications Training Facility aspects of this proposal have been previously granted.
